REPORT ON TITLE

(also serving as Certificate of Title to the Lender)

Prepared for	**Aldous Wren Capital Limited and Pennine Business Bank plc**
Prepared by	**Whitfield Carter LLP (James Osei, Senior Associate)**
Property	**Meridian Trade Park, Siskin Drive, Coventry CV3 4FJ**
Title number	**WM918244 (freehold, title absolute)**
Date	**14 November 2025**
Our reference	**WC-00157**

1. Executive summary

We have investigated the title to the Property and reviewed the results of the pre-contract searches and the Seller's replies to enquiries. Subject to the matters highlighted in section 7 (Issues for the Buyer's attention), we are satisfied that the Seller is able to transfer a good and marketable freehold title to the Property, sold subject to and with the benefit of the nine Occupational Leases, and that the Property provides adequate security for the proposed facility from Pennine Business Bank plc.

2. The Property

The Property comprises a multi-let industrial and trade-counter estate known as Meridian Trade Park, Siskin Drive, Coventry, extending to approximately 112,480 sq ft (10,449 sq m) on a site of approximately 5.74 acres, arranged as nine units (Units 1 to 9) with associated estate roads, yards and car parking. The aggregate passing rent is £986,400 per annum, reflecting a net initial yield of approximately 6.50% at the agreed price of £14,250,000.

3. Title

The Seller, Hartside Estates Limited, is registered at HM Land Registry as proprietor of the freehold estate with title absolute under title number WM918244. The official copies are dated 30 October 2025. The property register correctly describes the Property. The proprietorship register shows no restriction other than the standard form restriction relating to dispositions by the registered proprietor and a charge in favour of the Seller's existing lender, which will be discharged on or before completion (DS1 to be provided).

The charges register contains: (a) rights of way and drainage in favour of the adjoining owner granted by a transfer dated 12 June 1998; (b) the benefit and burden of estate service covenants; and (c) the financial charge referred to above. None of the entries materially affects the value or marketability of the Property for the Buyer's investment purposes.

4. Searches

Search	Result
Local authority (LLC1 / CON29)	**No adverse entries. The Property is not in a conservation area. Siskin Drive is an adopted, publicly maintainable highway. No outstanding enforcement or statutory notices.**
Drainage and water (CON29DW)	**Foul and surface water drainage connect to the public sewer; the Property is served by mains water. A public sewer crosses the eastern boundary — see issue 7.3.**
Environmental (Groundsure)	**"Passed" with a recommendation. Historic industrial use on and near the site; the report recommends reliance on the Buyer's environmental indemnity policy — see issue 7.2.**
Chancel / Coal mining	**Coventry is within a former coal mining area; the coal authority report is clear of recommendations. No chancel repair liability.**
Highways / planning	**Units benefit from B2/B8 and trade-counter use. No highways adoption issues.**

5. The Occupational Leases

We have reviewed the nine Occupational Leases. They are broadly on institutionally acceptable full repairing and insuring terms with upward-only rent reviews where applicable. The weighted average unexpired term to expiry is approximately 4.6 years. The income profile and lease covenants are summarised in the tenancy schedule annexed to the Contract for Sale. Unit 5 is vacant and is sold with vacant possession.

6. The transaction

The Buyer is acquiring the Property at a price of £14,250,000 (reduced from the initial £14,750,000 to reflect the vacancy at Unit 5 and the associated reletting risk). The sale is structured as a transfer of a going concern for VAT purposes. A retention of £65,000 is to be held in respect of roof repairs to Unit 2, and the rent deposit of £84,000 for Unit 6 is to be assigned to the Buyer. An overage of 30% of any residential development uplift is payable to the Seller for four years from completion, secured by a restriction.

7. Issues for the Buyer's attention

7.1 Unit 2 roof — there is localised water ingress to the roof of Unit 2. The agreed retention of £65,000 addresses this. We recommend the Buyer's surveyor certifies completion of the works before the retention is released.

7.2 Environmental — given the historic industrial use, we recommend the Buyer obtains an environmental indemnity insurance policy. We have obtained an indicative quotation and can arrange cover before completion.

7.3 Public sewer — a public sewer crosses the eastern boundary. Building over it would require the water authority's consent. This does not affect current use but should be noted if the Buyer pursues the overage development potential.

7.4 Rent arrears — Northgate Tooling Ltd (Unit 6) is one quarter in arrears. The rent deposit provides partial security. We have asked the Seller to pursue the arrears before completion.

8. Certificate to the Lender

We certify to Pennine Business Bank plc that, subject to the matters disclosed in this report and to completion taking place in accordance with the Contract for Sale and the discharge of the Seller's existing charge, the Buyer will on completion acquire a good and marketable freehold title to the Property capable of being charged by way of first legal mortgage to the Lender. This certificate is given on the terms of the City of London Law Society Land Law Committee's Certificate of Title (8th edition), subject to the disclosures above.
