Legal Due Diligence Report (Summary) — Brightwater Analytics Limited

Prepared for Westbridge Growth Capital LLP by Birchall Stone LLP — 20 January 2026

This summary report sets out the principal findings of the legal due diligence exercise carried out on Brightwater Analytics Limited (the "Company") in connection with the proposed Series B investment. It should be read with the detailed appendices in the data room and the disclosure letter. Capitalised terms have the meaning given in the subscription agreement.

1. Corporate

The Company is duly incorporated in England and Wales (no. 10894522). The current share capital comprises Ordinary, Series A Preferred and (on completion) Series B Preferred Shares. The statutory registers were inspected and are materially up to date, save that the PSC register requires updating to reflect the incoming Investor Director nominee rights post-completion.

2. Share capital and prior rounds

The Series A round (Ravensworth Ventures LLP and Aldridge Seed LP) completed in 2023. Pre-emption rights and consent thresholds in the existing articles have been reviewed; the requisite consents and waivers for the Series B issue are being obtained as a condition to completion. The EMI option pool currently stands at 240,000 options and is to be enlarged to 12% of the fully-diluted post-money capital.

3. Intellectual property

The Company owns or licenses the IP underpinning its claims-analytics platform. Two open-source components (Apache-2.0 and MIT licensed) are incorporated and used in compliance with their licences. The UK trade mark application for "Brightwater" (UK00003876541) remains pending. Assignment of IP from the founders and early contractors has been verified, with one historic contractor assignment to be confirmed (low risk).

4. Material contracts and customers

The Company's revenue is concentrated in a small number of insurer customers. The contract with the second-largest customer expires in June 2026 and is in renewal discussions; no termination notice has been served. Change-of-control provisions in the top ten customer contracts were reviewed; none is triggered by the Series B investment.

5. Data protection

The Company acts as a processor for insurer personal data and has UK GDPR-compliant data processing terms in place, save that the addendum with Pennine Mutual Insurance plc is in the course of re-signature. A minor August 2025 data incident was assessed as not reportable and remediated.

6. Litigation and disputes

No litigation is pending or threatened, save for an intimated (but unissued) claim by a former contractor (Mr R. Halligan) for unpaid invoices of £18,400, which the Company disputes.

7. Employment and tax

Employment contracts and policies are in order. PAYE/NIC and VAT compliance were confirmed. The EMI valuation agreed with HMRC dates from March 2024; options granted since the term sheet (14,000 shares) require a fresh valuation.

8. Key findings and conditions

Item	Risk	Action / condition
Customer #2 renewal (Jun 2026)	Medium	Information right; monitor renewal
Pennine Mutual DPA re-signature	Low	Complete before / shortly after completion
EMI fresh valuation (post term sheet grants)	Low	Company to obtain updated valuation
Halligan contractor claim	Low	Disclosed; warranty cap applies
PSC register update	Low	Update post-completion

Subject to satisfaction of the conditions in the subscription agreement and the disclosures in the disclosure letter, the due diligence has not revealed any matter that should prevent the Investors from proceeding with the Series B investment.
