VALIDITY AND FREEDOM-TO-OPERATE CONFIRMATION

Project Umbra — AtlasMRV Patent Family

Our ref: AF/CAS/UMBRA-04 Date: 16 February 2026

Addressed to: Caspian Technologies Limited and Whitfield Carter LLP

1. INSTRUCTIONS

We are instructed to confirm the status of the AtlasMRV Patent Family and to provide a high-level freedom-to-operate (FTO) view in connection with the proposed exclusive licence to Hollencroft Industrial Group plc of the AtlasMRV platform within the supply-chain emissions-reporting field.

2. THE PATENT FAMILY

We have reviewed the registers of the UKIPO, the EPO and the USPTO. The family comprises:

Reference	Title (short)	Status
GB2598471	Satellite-derived facility emissions estimation	Granted (priority 04.03.2021)
EP3987654	European equivalent of GB2598471	Granted; validated GB, DE, FR, NL
US11,887,123	US equivalent of GB2598471	Granted 30.01.2024
GB2611902	Sensor-fusion calibration for emissions inference	Granted (priority 18.08.2022)
EP4123456	European equivalent of GB2611902	Pending — examination
US 18/345,221	US equivalent of GB2611902	Pending — first office action awaited

3. VALIDITY

In our opinion the granted members (GB2598471, EP3987654, US11,887,123 and GB2611902) are valid and in force, renewal fees being paid to date. We are aware of no pending opposition or revocation action. We note the third-party query raised by Verdigris Sensing Ltd in March 2024 regarding GB2611902; for the reasons in our opinion of 9 April 2024 we do not consider EP2901xxx to anticipate or render obvious the granted claims of GB2611902 as implemented in AtlasMRV.

4. FREEDOM TO OPERATE

Our searches of relevant classifications did not identify any third-party patent that, on a reasonable construction, would be infringed by the AtlasMRV implementation within the licensed field. This confirmation is given to a high level and is not an exhaustive FTO clearance; it should be read with the Disclosure Letter.

5. CONCLUSION

We confirm that the AtlasMRV Patent Family is suitable to support the proposed exclusive licence and that we are not aware of any matter that would prevent Caspian from granting it.

Dr Alan Foster, Partner & Chartered Patent Attorney, Hartington IP
