PROJECT SOLSTICE

Legal Due Diligence Report — Larkmoor Bioscience Limited

Prepared for Ardent Ventures LLP by Whitfield Carter LLP (on behalf of the Company) — 28 August 2025

1. Introduction and scope

This report summarises the principal findings of the legal due diligence exercise carried out in connection with the proposed Series A investment in Larkmoor Bioscience Limited (the "Company"). It is based on the documents made available in the online data room as at 25 August 2025, the Company's replies to our enquiries, and public searches at Companies House, the UK Intellectual Property Office and HM Land Registry. This report is qualified in its entirety by the matters set out in the Disclosure Letter.

2. Corporate

The Company is a private company limited by shares incorporated in England and Wales (no. 11820447) on 6 March 2019. The statutory registers are maintained and are up to date. The current issued share capital is 6,000,000 Ordinary Shares of £0.001 each, of which the Founders hold 4,200,000 in aggregate. No material defects in the corporate record were identified.

3. Share capital and options

The pre-money fully diluted share capital comprises 6,000,000 shares (including a 240,000-share EMI option pool reserved). On completion the Company will issue 2,000,000 Series A Preferred Shares to the Investor at £4.00 per share. We confirm that the EMI options granted to date appear to satisfy the qualifying conditions under Schedule 5 ITEPA 2003, subject to the Company increasing the pool to 12.0% post-money as contemplated. No outstanding warrants, convertible loan notes or other rights to subscribe were identified other than as disclosed.

4. Intellectual property

The Company's core technology is protected by a patent family (PCT/GB2023/050412, "cell-free expression scaffold") which is at national phase entry in the EP, US and JP jurisdictions. The US application has received a first office action (14 April 2025) raising obviousness objections; a response is in preparation. The patent is not yet granted in any jurisdiction. Material background IP is the subject of a sponsored research agreement with the University of Cambridge dated 3 March 2024 under which the University retains certain background rights — investors should note this as a key dependency. Employee and consultant IP assignments are in place for all key personnel.

5. Material contracts

The Company's material contracts are limited and in the ordinary course. No change-of-control provisions triggered by the Investment were identified, save for a non-exclusive software licence from Brennan Instruments Ltd terminable on 90 days' notice. We recommend the Investor note the University sponsored research agreement (item 4 above) as the principal contractual dependency.

6. Employment

The Company has 14 employees. Standard form contracts are used and contain confidentiality and IP assignment provisions. One employee (Head of Assay Development) is serving notice and will leave on 31 October 2025. A former contractor grievance (February 2025) was resolved without payment. No collective consultation or TUPE issues arise.

7. Litigation and disputes

No litigation is in progress or, so far as we are aware, threatened, save a disputed supplier demand from Calderhall Labware for £8,400 (March 2025), which the Company disputes and in respect of which no proceedings have been issued.

8. Property

The Company occupies laboratory and office premises at Unit 7, Granta Park under a lease expiring in 2028 with a tenant break in 2026. The lease is in good standing and contains no change-of-control restriction.

9. Key findings and recommendations

1. Patent not yet granted in any jurisdiction; US office action outstanding — recommend ongoing monitoring and an IP warranty qualified by the Disclosure Letter (reflected in Schedule 3, Part 3).
2. University of Cambridge sponsored research agreement is a key IP dependency — recommend the Investor satisfy itself on the scope of retained background rights.
3. EMI pool to be increased to 12.0% post-money by post-completion board resolution.
4. No material litigation or change-of-control issues; disputed supplier demand (£8,400) is immaterial.

This report is provided to Ardent Ventures LLP for the purposes of the Investment only and is subject to the Disclosure Letter. It does not constitute tax or commercial advice.
